

NEW FOR 2018

# Combine two degrees in as little as 4 years

## Conjoint Bachelor of Product Design and Science (BProdDesign/BSc)

Combine two great degrees, in as little as 4 years, and broaden your career opportunities.

UC is offering the conjoint BProdDesign/BSc degree in 2018

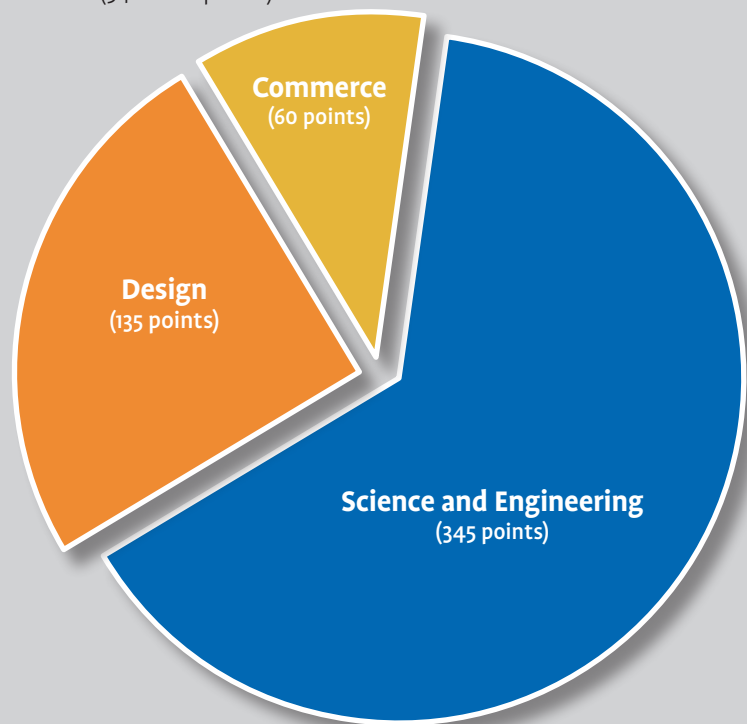

Imagine combining your favourite Bachelor of Science subjects with a Bachelor of Product Design. Here are just a few examples of major combinations you could consider to complete a conjoint degree, in a 4-year timeframe. Other combinations of majors from the Bachelor of Product Design and Bachelor of Science programme may be available. Please contact our Student Advisors for more information.

- BProdDesign(Applied Immersive Game Design) with BSc(Computer Science)
- BProdDesign(Chemical, Natural & Healthcare Product Formulation) with BSc(Chemistry)
- BProdDesign(Chemical, Natural & Healthcare Product Formulation) with BSc(Biochemistry)

The BProdDesign/BSc conjoint is a fantastic balance of Science and Engineering, Commerce and Design:

The conjoint Bachelor of Product Design and Science (540 total points)

### More information

Careful course planning is necessary when you are planning on studying double or conjoint degrees, to avoid overload and to ensure all the requirements for each degree are met.

# Conjoint Degree

## Conjoint Bachelor of Product Design and Science (BProdDesign/BSc)

### Conjoint degrees

Conjoint degrees are accelerated programmes for high-achieving students, which combine two degrees in as little as 4 years.

The accelerated programmes require 60 points less than a double degree, as well as a minimum sustained grade point average (equivalent to a B-) and a higher workload at 135 points per year. Students must graduate in both degrees that are part of the conjoint at the same time.

By combining a Bachelor of Product Design with a Bachelor of Science, students will develop skills in the aesthetic and technical design of products in their fields of interest, along with business skills to complement their specialised scientific knowledge.

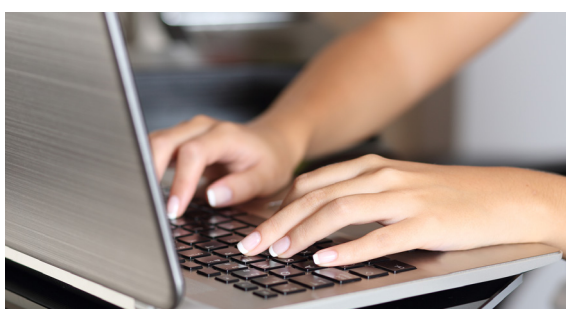

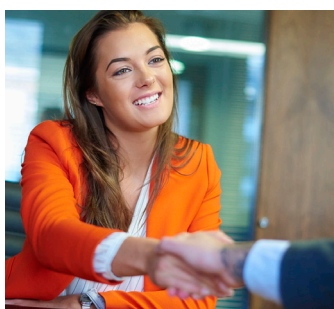

### What do I need to join the conjoint programme?

To study a conjoint degree programme you will need:

- Overall Merit Endorsement in NCEA or equivalent scores in IB or CIE to join right from your 1st Semester.  
or
- Earn a Grade Point Average of at least 4.0 (a "B-" average) to join the programme later on in your university studies.

### How can I enrol for a conjoint programme?

To enrol on a BProdDesign/BSc conjoint degree programme you will need to select the **Conjoint Bachelor of Product Design and Science** option on the MyUC webpage when selecting your courses.
