

The Child Well-being Research Institute

PhD Student Seminar Series

This programme is designed for recently enrolled PhD students **OR** those who are enrolled in PhD study, that wish to be part of a cohort approach to learning.

We encourage all PhD candidates with topics connected to well-being, **OR** research topics related to the preparation of students who will contribute to people's well-being (e.g. preparation of future teachers and health professionals) to attend the series, regardless of alignment with CWRI. Students can belong to any School or College. If you have any questions about suitability, please contact the programme co-ordinator.

The programme is designed on a tiered, Tuakana-teina model. We have a mixture of PhD candidates at varying stages of completion. The tiered approach is designed purposively, with weekly engagement and intensive support planned for the first half of the year during this seminar series. This changes in semester 2, with 2 x 5-week blocks of seminar sessions, as students work more independently and take advantage of usual support programme for researchers and doctoral students at UC.

Wednesday evenings **commencing March 4th**
4pm - 6pm followed by social activity 6pm - 7pm

Venue Manawa

276 Antigua Street, Christchurch Central City, Christchurch 8011

Associated readings, helpful website links and other materials will be emailed directly, and stored on our LEARN site. All content is available to those who attend.

Programme Co-ordinator: Dr Susannah Stevens
