The Child Well-being Research Institute

PhD Student Seminar Series

This programme is designed for recently enrolled PhD students or those in their first year of PhD study. We encourage all students interested in studying aspects of people's well-being or research related to the preparation of students who will contribute to people's well-being (e.g. preparation of future teachers and health professionals) to attend the series regardless of alignment with CWRI.

The programme is designed on a tiered model: Regular engagement is planned for the student's first year during this seminar series. It is envisaged that during the second year of the doctoral students' studies the students would participate in monthly scheduled meetings within the CWRI Institute (or other research labs) to take advantage of usual support programme for researchers and doctoral students.

First Semester 2019

Wednesday evenings 4pm - 6pm followed by social activity 6pm - 7pm
Venue Manawa (occasionally Rehua).
Associated readings, helpful website links and other materials will be emailed directly, then stored on our PHD LEARN site
